UI/UX Designer

artemii.barashkov.dev@gmail.com | +357 99 236244 | Limassol, Cyprus | [LinkedIn](#) | [Portfolio](#)

## Summary

---

UI/UX Designer who designs flows and screens from wireframes to high-fidelity UI, across web platforms and internal tools. Recent work includes a complete platform redesign and usability testing on a fintech trading platform. I work in Figma and write front-end code, so specs cover the states and edge cases developers ask about.

## Skills

---

**Technical:** Figma, Adobe Creative Suite, WordPress, Git, GitHub

**Design:** Product Design, UX Design, UI Design, User Flows, Wireframing, High-Fidelity UI, Responsive & Mobile Design

## Languages

---

- Russian (Native)
- Greek (Fluent)
- English (Fluent)

## Work Experience

---

### XM Trading

**Jun 2026 – Present**

*UI/UX Designer*

*Limassol, Cyprus*

- Redesigned the AI chatbot interface used by millions of users worldwide, from wireframes to final UI. Fixed usability problems and made the visual treatment consistent across the conversation flow.
- Worked with product managers and developers to pin down requirements, edge cases and the empty, loading and error states before build started.
- Wrote developer-ready design specifications, which cut down the back and forth at design-to-code handoff and got implementations to match the designs pixel for pixel.

### TPGMS Platform Redesign

- Redesigned the platform in full, taking every section from wireframes through to final high-fidelity UI.
- Reworked the flows and screens across the platform so layout, spacing and hierarchy stayed consistent from one section to the next.
- Reused and extended the existing component library, and added new components where the redesign needed them.

### Usability Testing – XM's Main Trading Platform

- Ran usability testing on the company's main trading platform, a complex, data-heavy fintech product, to find where users were getting stuck.
- Turned the findings into design recommendations and screen changes, and used them to justify design decisions to product and development teams.

### Freelance Work

**Jan 2026 – Jun 2026**

*UI/UX Designer & Developer*

*Limassol, Cyprus*

- Designed and developed two SaaS products independently, from first flows and wireframes through to final UI and launch.
- **CasePilot**, case management software for law firms: an admin-style dashboard for tracking client cases, built on a reusable set of tables, status indicators, forms and modals. [Live Link](#) | [GitHub](#)
- **Lead Inbox**, a B2B lead platform for consulting firms: category filtering and a lead inbox that stays scannable with large result sets. [Live Link](#) | [GitHub](#)

### Think Positive New Media

**Sep 2025 – Dec 2025**

*Web Designer/Web Developer – Intern*

*Limassol, Cyprus*

- Made UI/UX improvements to existing client websites, including accessibility fixes and clearer layout and navigation. Applied accessibility practices and UI/UX fixes to existing websites so they were easier to use.

- Designed and built responsive layouts that held their structure across desktop and mobile.
- Built and customised WordPress websites, and kept templates and components visually consistent.

## Education

---

**Cyprus University of Technology**

*Bachelor's in Multimedia Design*

**Sep 2022 – May 2026**

*Limassol, Cyprus*
